

useful information

GU10 items

All GU10 products are designed to be compatible with a standard GU10 lamp length of 53mm. The minimum recess depth dimensions specified for our products are based on this standard lamp length of 53mm, providing a clear guideline for installation. Where items are designed for use with a longer GU10 lamp length this is indicated in the key features on the product page.

GU10 lamps are not included.

Dimming

All dimmable products are compatible with mains leading and/or trailing edge dimming. We test all our dimmable products for compatibility with Varilight Pro-dimmer modules. We cannot guarantee the compatibility of other leading / trailing edge dimmers.

Products with this icon are limited stock items.

Colour Rendering Index (CRI)

All products have a minimum CRI >80. CRI>90 products are indicated on the page.

Photometric files

Where possible, we provide LDT/IES data for our products to facilitate the generation of lighting plans to ensure seamless integration into your projects. These are available to download from our product pages at...

www.projectcollection.co.uk

We can further assist in the generation of effective lighting designs for your projects. Whether you need guidance on product selection, positioning, or other aspects of lighting planning.

Power Factor

Every product in our range delivers a minimum power factor of 0.9, unless otherwise specified.

Warranty

All products are manufactured and inspected in order to meet the technical and quality standards demanded by the market. These come with a standard 5 year warranty out of the box.

We understand that coastal environments can subject products to unique challenges, such as saltwater exposure and extreme weather conditions, our 5 year warranty includes all outdoor products with this icon, when used in locations up to 1km from the coast.
